

Pro/INTRALINK 9.0/9.1 Business Administration

Course Code	TRN-2146-T
Course Length	3 Days

Overview

Pro/INTRALINK is designed to help designers and manufacturers control design information and manage the processes associated with product development. In this course, you will learn how to perform basic Pro/INTRALINK 9.0 and 9.1 administration tasks. You will learn how to plan and create user accounts and groups, and how to plan and create information management storage strategies. Other topics include life cycles, teams, configuring domain policies, and configuring Pro/ENGINEER integration. These skills are important because they enable a Business Administrator to configure Pro/INTRALINK to meet business needs.

At the end of each module, you will complete Pro/FICIENCY skills assessment questions. These questions are used to help reinforce your understanding of the course topics and form the basis for daily review sessions.

After completing the course, you will be well prepared to set up and manage a basic Pro/INTRALINK implementation at your company.

Prerequisites

- Introduction to Pro/INTRALINK 9.0/9.1 instructor-led training course.
- Knowledge of your company's information management business rules, business requirements, and existing business processes.

Audience

This course is intended for Business Administrators, System Administrators, and project team leaders. Implementation team members, including user adoption team members, and those with general Pro/INTRALINK administration responsibilities will also benefit from taking this course.

Topics

- Planning and creating user accounts and groups.
 - Planning and creating information storage locations: Products and Libraries.
 - Planning and configuring data management access control policies.
 - Planning and implementing data management templates.
 - Planning and configuring user notification of system events.
 - Managing data development and business processes through life cycles.
 - Configuring Pro/ENGINEER integration.
 - Administering new designs.
 - Working with Pro/INTRALINK administration support tools.
 - Identify new user and administration preferences.
 - Enable packages and administer package roles.
 - Configure new object relationships.
-

- Move objects between organizations and contexts.

Agenda

Day 1

Module 1	Introduction to Pro/INTRALINK 9.0 Business Administration
Module 2	Managing Principals
Module 3	Managing Object Types and Attributes
Module 4	Managing Contexts
Module 5	Automating Processes Using Life Cycles

Day 2

Module 6	Managing Domain Policies and Access Control
Module 7	Managing Teams
Module 8	Managing Object Type Behavior
Module 9	Configuring Pro/ENGINEER for Windchill

Day 3

Module 10	Administering New Designs in Windchill
Module 11	Administrative Support Tools
Module 12	Administering Pro/INTRALINK and Testing the Business Environment

Table Of Contents

Pro/INTRALINK 9.0/9.1 Business Administration

Introduction to Pro/INTRALINK 9.0 Business Administration

Introduction.....	1-1
Objectives.....	1-1
Lecture Notes.....	1-2
Pro/INTRALINK 9.0.....	1-3
Basic Architecture – Servers.....	1-5
Basic Architecture – Client Machines.....	1-6
Basic Architecture – Oracle Server.....	1-7
Basic Architecture – Indexing Server.....	1-8
Basic Architecture – LDAP Server.....	1-9
Basic Architecture – Mail Server.....	1-10
Understanding Pro/INTRALINK Terminology.....	1-11
Explaining the Role of the Business Administrator.....	1-16
Planning a Pro/INTRALINK Implementation.....	1-17
Identifying the Data to be Managed.....	1-19
Common Pro/INTRALINK Objects.....	1-20
Identifying Users Requiring Access to the Data.....	1-21
Identifying a Data Storage Strategy.....	1-22
Identifying Business Processes.....	1-23
Identifying How Users Interact with Data.....	1-24
Identifying a Notification Strategy.....	1-25
Identifying an Indexing Strategy.....	1-26
Planning the Implementation.....	1-27
Pro/INTRALINK Using Windchill Technology.....	1-34
Course Structure.....	1-35
Mapping Pro/I 3.x Administration to Pro/I 9.0.....	1-36
Summary.....	1-38

Managing Principals

Introduction.....	2-1
Objectives.....	2-1
Lecture Notes.....	2-2
Identifying Users.....	2-3
Understanding Contexts.....	2-4
Users and Groups.....	2-5

User Accounts.....	2-6
Groups.....	2-7
System User and Group Structure Diagram.....	2-8
Best Practices for Organizations, User Accounts, and Groups.....	2-9
Administrative Navigation.....	2-10
Creating a Windchill Organization.....	2-11
Creating Users and Groups.....	2-12
Creating User Accounts.....	2-13
Testing User Accounts.....	2-14
Troubleshooting User Accounts.....	2-15
Creating Groups.....	2-16
Group Membership.....	2-17
Managing Existing Principals.....	2-18
Updating User Account Information.....	2-19
Removing a User Account.....	2-20
Identify the Results of Deleting a User.....	2-21
Identify Business Process Implications of Deleting User Accounts.....	2-22
Identify Workspace Implications of Deleting User Accounts.....	2-24
Deleting a User Account.....	2-25
Removing a Group.....	2-26
Identify the Results of Deleting a Group.....	2-27
Identify Business Process Implications of Deleting Groups.....	2-28
Deleting a Group.....	2-29
Deleting an Organization.....	2-30
Windchill Principal Maintenance Tool.....	2-31
Lab Exercises.....	2-32
Exercise 1: Creating User Accounts.....	2-32
Exercise 2: Creating Groups.....	2-34
Exercise 3: Adding Users to Groups.....	2-35
Exercise 4: Deleting Users.....	2-37
Summary.....	2-38
Managing Object Types and Attributes	
Introduction.....	3-1
Objectives.....	3-1
Lecture Notes.....	3-2
Windchill Business Objects.....	3-3
Windchill Object Typing Capability.....	3-4
Creating Soft Types.....	3-5

The Attribute Definition Manager.....	3-6
The Type Manager.....	3-7
Defining Soft Types and Soft Attributes.....	3-8
Soft Attribute Constraints.....	3-9
Document and Reference Document Types.....	3-11
Using Document and Reference Document Types.....	3-13
Adding Soft Attributes to CAD Document Types.....	3-14
Best Practices for using the Type Manager.....	3-15
Measurement System Administration.....	3-16
Quantity of Measure Administration.....	3-17
Lab Exercises.....	3-18
Exercise 1: Creating Soft Attributes.....	3-18
Exercise 2: Adding Attributes to Document Types.....	3-21
Summary.....	3-22
Managing Contexts	
Introduction.....	4-1
Objectives.....	4-1
Lecture Notes.....	4-2
Understanding Contexts.....	4-3
Relationships Between Contexts.....	4-4
Identifying Locations for Storing Data.....	4-7
Windchill Product Characteristics.....	4-9
Results of Creating a Product.....	4-10
Windchill Library Characteristics.....	4-11
Results of Creating a Library.....	4-12
Windchill Project Characteristics.....	4-13
Results of Creating a Project.....	4-14
Windchill Program Characteristics.....	4-15
Results of Creating a Program.....	4-16
Assigning Application Context Creators.....	4-17
Creating Products.....	4-18
Creating Libraries.....	4-19
Creating Projects.....	4-20
Creating Programs.....	4-21
Using Folders.....	4-22
Context Templates.....	4-23
Creating an Application Context Template.....	4-25
Organization Templates.....	4-26

Actions for Context Templates.....	4-27
Lab Exercises	4-28
Exercise 1: Assigning Product and Library Creators.....	4-28
Exercise 2: Creating Products.....	4-30
Exercise 3: Creating Folders.....	4-31
Exercise 4: Creating Libraries.....	4-32
Exercise 5: Creating Product Context Templates.....	4-33
Summary	4-33
Automating Processes Using Life Cycles	
Introduction.....	5-1
Objectives.....	5-1
Lecture Notes.....	5-2
Identifying Business Processes.....	5-3
Assess Your Business Processes	5-4
Identifying Life Cycles, Workflow Templates, and Teams.....	5-5
Understanding Windchill Life Cycles.....	5-6
Understanding Windchill Life Cycle Types	5-7
Common Windchill Life Cycle Managed Objects.....	5-8
Defining Object Life Cycle Resolution	5-9
Creating a Life Cycle.....	5-10
Specifying Life Cycle Properties	5-11
Adding Life Cycle States	5-12
Defining States.....	5-13
Identifying Life Cycle State Names.....	5-14
Identifying a Version Series.....	5-15
State-Based Versioning Example.....	5-16
Understanding Transitions.....	5-17
Defining Transitions.....	5-18
Understanding Life Cycle Transition Types	5-19
Transition Examples.....	5-24
Defining Role Participation.....	5-25
Defining Access Permissions using Life Cycles.....	5-26
Choosing Workflow Templates	5-27
Life Cycle and Workflow Template Relationships.....	5-28
Specifying Promotion Criteria.....	5-30
Life Cycle Best Practices.....	5-31
Lab Exercises	5-32
Exercise 1: Creating Basic Life Cycle Templates.....	5-32

Summary	5-34
Managing Domain Policies and Access Control	
Introduction.....	6-1
Objectives.....	6-1
Lecture Notes	6-2
Windchill Context Architecture.....	6-3
Understanding Context and Domain Relationships.....	6-4
Defining Windchill Domain Architecture.....	6-5
Defining Windchill User Domain Architecture.....	6-6
Defining Windchill System Domain Architecture.....	6-7
Defining Windchill Special Site Domain Architecture.....	6-8
Defining Windchill Data Domain Architecture.....	6-9
Defining Windchill Private Domain Architecture.....	6-11
Defining Windchill Folder Domain Architecture.....	6-12
Domain Architecture in the Policy Administrator.....	6-13
Defining Windchill Domain Policies.....	6-14
Understanding Access Control.....	6-15
Planning Access Control Strategies.....	6-16
Defining Access Control Permissions.....	6-17
Access Control Permission Selection.....	6-19
Permissions Needed for Move Operations.....	6-20
Permissions Needed for Set Life Cycle State Operations.....	6-21
Permissions Needed for Modify Identity Operations.....	6-22
Permissions Needed for View/Download Content Operations.....	6-23
Permissions Needed for Modify Content Operations.....	6-24
Defining Access Control Policy Rules.....	6-25
Understanding Access Control Policy Rules - Example.....	6-26
Access Control Permission Considerations.....	6-27
Domain Access Control Permission Rules.....	6-29
Calculating Domain Policy Permissions - Example.....	6-30
Best Practices for Applying Access Control Rules.....	6-31
Ad-Hoc Access Control.....	6-32
Checking Access Control Permissions.....	6-33
Troubleshooting Access Control Issues.....	6-34
Defining a Notification Policy.....	6-35
Implementing a Notification Policy.....	6-36
Troubleshooting Context-based Notifications.....	6-37
Defining an Indexing Policy.....	6-38

Implementing an Indexing Policy.....	6-39
Lab Exercises	6-40
Exercise 1: Creating Domains and Setting Domain Policies.....	6-40
Exercise 2: Setting Folder Domains.....	6-42
Summary	6-42
Managing Teams	
Introduction.....	7-1
Objectives.....	7-1
Lecture Notes.....	7-2
Team Management.....	7-3
Terminology.....	7-4
Context Teams.....	7-12
Context Team Architecture.....	7-13
Context Team Example.....	7-16
Applying Access Control with Context Teams.....	7-21
Access Control for Application Context Templates.....	7-22
Best Practices for Using Context Teams for Access Control.....	7-23
Shared Teams.....	7-24
Shared Teams Where Used Query.....	7-25
Using a Shared Team.....	7-26
Role Resolution with Teams.....	7-27
Understanding Role Resolution and Team Templates.....	7-28
Understanding Role Resolution and Context Teams.....	7-29
Understanding Role Resolution and Team Instances.....	7-30
Team Instance Definition.....	7-31
Defining Object Team Template Resolution.....	7-33
Creating Team Templates.....	7-34
Proper Team Role Resolution.....	7-35
Team Role Resolution Best Practices.....	7-36
Product and Library Template Context Team Roles.....	7-37
Project and Program Template Context Team Roles.....	7-38
Guests Context Role.....	7-39
Members Context Role.....	7-40
Application Context Manager Role.....	7-41
Change Administrator and Change Review Board Context Roles.....	7-42
Promotion Approvers and Reviewers Context Roles.....	7-43
Organization Roles.....	7-44
Application Context Roles.....	7-45

Custom Resource Bundle Roles	7-46
Team Management Best Practices	7-47
Lab Exercises	7-48
Exercise 1: Administering Organization Roles	7-48
Exercise 2: Administering Context Teams	7-49
Summary	7-49
Managing Object Type Behavior	
Introduction	8-1
Objectives	8-1
Lecture Notes	8-2
Object Initialization Rules	8-3
Object Initialization Rule Management	8-4
Object Initialization Rule Example	8-6
Object Numbering Scheme Rules	8-7
Versioning Scheme Rules	8-9
Folder Path Rules	8-11
Life Cycle Association Rules	8-12
Team Template Association Rules	8-13
Lab Exercises	8-14
Exercise 1: Administering Object Initialization Rules	8-14
Summary	8-15
Configuring Pro/ENGINEER for Windchill	
Introduction	9-1
Objectives	9-1
Lecture Notes	9-2
Using Windchill with Pro/ENGINEER	9-3
Windchill Workgroup Manager	9-4
Windchill Workgroup Manager Architecture	9-5
Pro/ENGINEER Client Configuration Elements	9-7
Pro/ENGINEER Client Configuration Files	9-9
Resolving Pro/ENGINEER Configuration Settings	9-11
Pro/ENGINEER Configuration Options	9-12
Registering a Windchill Server	9-14
Preference Management	9-16
Windchill Workgroup Manager Client Preferences	9-18
Windchill Server Configuration Elements	9-19
Windchill Workgroup Manager Server Preferences	9-20
General Preferences	9-22

The Type and Attribute Manager.....	9-23
Mapping Pro/ENGINEER Parameters to Windchill Attributes.....	9-24
Implicit Parameter-to-Attribute Mapping.....	9-25
Versioned versus Non-versioned Attributes.....	9-27
Object Initialization Rules.....	9-28
CAD Document Naming and Numbering.....	9-29
CAD Document Naming and Numbering Policies.....	9-31
Identifying the Current Naming and Numbering Policy.....	9-32
Autonumbering Policy.....	9-33
Custom Policy.....	9-34
Parameter-driven Policy.....	9-35
Name-driven Policy.....	9-36
Client Preferences for Naming and Numbering.....	9-37
Configuration Checklist.....	9-38
Lab Exercises.....	9-42
Exercise 1: Configuring Pro/ENGINEER to Interact with Windchill.....	9-42
Exercise 2: Creating a Server Registration File.....	9-45
Exercise 3: Configuring Name and Numbering Preferences for CAD Documents.....	9-47
Exercise 4: Configuring Windchill Workgroup Manager Server Preferences.....	9-49
Summary.....	9-50
Administering New Designs in Windchill	
Introduction.....	10-1
Objectives.....	10-1
Lecture Notes.....	10-2
Windchill Design Templates.....	10-3
Understanding Design Template Use.....	10-4
Design Template Access.....	10-5
Establishing Start Models Stored in CAD Documents.....	10-6
Creating CAD Document Templates.....	10-7
Lab Exercises.....	10-8
Exercise 1: Establishing Start Models Stored in CAD Documents.....	10-8
Exercise 2: Creating CAD Document Templates.....	10-11
Summary.....	10-12
Administrative Support Tools	
Introduction.....	11-1
Objectives.....	11-1
Lecture Notes.....	11-2
Using ModelCHECK Validation During Check In.....	11-3

Administrator-Saved Searches.....	11-4
Visualization Publishing.....	11-5
Purge Manager.....	11-9
Security Auditing and Usage Reporting.....	11-11
License Usage Reporting.....	11-12
Security Audit Reporting.....	11-13
Auditable Events.....	11-14
Information Captured in the Log.....	11-15
Lab Exercises.....	11-16
Exercise 1: Creating Administrator-Saved Searches.....	11-16
Exercise 2: Executing Audit Reports.....	11-18
Summary.....	11-19
Administering Pro/INTRALINK and Testing the Business Environment	
Introduction.....	12-1
Objectives.....	12-1
Lecture Notes.....	12-2
Course Structure.....	12-3
Pro/INTRALINK 9.0.....	12-4
Planning a Pro/INTRALINK Implementation.....	12-6
Identifying the Data to be Managed.....	12-7
Identifying Users Requiring Access to the Data.....	12-8
Identifying a Data Storage Strategy.....	12-9
Identifying Business Processes.....	12-10
Identifying How Users Interact with Data.....	12-11
Team Management Best Practices.....	12-12
Pro/ENGINEER Client Configuration Elements.....	12-13
Windchill Server Configuration Elements.....	12-15
Pro/INTRALINK Design Templates.....	12-16
Testing the Business Environment.....	12-17
Lab Exercises.....	12-18
Exercise 1: Testing the Business Environment.....	12-18
Summary.....	12-19
Windchill 9.1 Business Administration Enhancements	
Introduction.....	A-1
Objectives.....	A-1
Lecture Notes.....	A-2
Administering Preferences.....	A-3
Understanding Iteration and Revision Controls.....	A-4

Check-Out of Non-Latest Iteration.....	A-5
Managing the Check-Out of Non-Latest Iterations.....	A-6
Revising the Non-Latest Revision of an Object.....	A-7
Managing the Revision of Non-Latest Object Revisions.....	A-8
Workspace Frames.....	A-9
Configuring Workspace Frames.....	A-10
Managing Workspace Frames.....	A-11
Managing Promotion Preferences.....	A-12
Understanding the Promote Action in a Basic Life Cycle.....	A-13
The Promotion Request Approval Process.....	A-14
The Promotion Request Review Process.....	A-15
Managing Promotion Preference Processes.....	A-16
Creating a New Promotion Process Preference.....	A-17
Changing a Promotion Preference.....	A-18
Packages.....	A-19
Administering Packages.....	A-20
Administering Package Roles.....	A-21
Windchill Link Typing Capability.....	A-22
Identifying Link Behavior.....	A-23
The Relationship Constraint Manager.....	A-25
Creating a Relationship Constraint.....	A-26
The Move Action.....	A-27
Moving an Object.....	A-28
Summary.....	A-28
