- 200+ PMI ACP practice questions
- Practice questions by domains and rationales
- Online real-world practice PMI ACP certification exam to test learnings at end of course
- **Please see page 2 for detailed topic list**

Prerequisites

There are three fundamental PMI ACP certification requirements.

1. You must have 2,000 hours of general project experience working on teams. This makes around 1.5-2 years of experience. If you hold a PMP or PgMP certification, you will satisfy this requirement automatically. However, satisfying this requirement alone is not sufficient to sit for PMI ACP exam.
2. You must have 1,500 hours of working experience on agile project teams or with agile methodologies. This requirement is in addition to the first one.
3. You must have attended a 21 contact hours of training in agile practices. This PMI ACP Certification Training satisfies this requirement.

Audience

Agile project management is trending in all industries. PMI ACP (agile certified practitioner) certification is an essential professional requirement across industries for agile project management roles. PMI ACP certification is most suited for:

- Project managers
- Associate/Asst. Manager - Projects
- Team leads/Managers
- Project Executives/Engineers

- Software Developers
- Any professional aspiring to be a Agile Project Management Professional
