

Mathcad Prime 5.0 Essentials

Overview

Course Code	TRN-5340-T
Course Length	16 Hours

In this course, you will learn the basics of Mathcad Prime. You will learn about Mathcad Prime's extensive functionality, such as opening and working with Mathcad files, navigating workspaces, defining variables and expressions, and solving equations. In addition, you will learn how to plot graphs, solve for roots, and manipulate data.

At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in PTC University Proficiency intended to evaluate your understanding of the course as a whole.

This course has been developed using Mathcad Prime 5.0 F000.

Course Objectives

- Open and save Mathcad files
- Navigate the Mathcad workspace
- Develop Mathcad templates
- Identify and format math and text regions
- Develop and edit math expressions
- Define, evaluate, and use variables
- Assign an expression retroactively
- Define and evaluate user-defined and built-in functions
- Define, evaluate, and use range variables
- Use units in calculations
- Plot 2-D and 3-D graphs
- Solve for the roots of a function with a single independent variable
- Symbolically solve equations
- Numerically solve a system of linear and nonlinear equations
- Solve unconstrained and constrained optimization problems

$$v(t) := 10 \cdot \frac{m}{s} + \left(-20 \cdot \frac{m}{s^2}\right) \cdot (t - 3 \cdot s) \cdot (t > 3 \cdot s)$$

- Solve ordinary differential equations
- Create a program within the Mathcad worksheet using Mathcad's programming features
- Import and export data
- Smooth, interpolate, and regress data

Prerequisites

- None

Audience

- This class is intended for novice and intermediate Mathcad users. People in related roles will also benefit from taking this course.
-

Agenda

Day 1

Module	1	Getting Started
Module	2	Documenting and Formatting
Module	3	Entering and Editing Math
Module	4	Variables
Module	5	Functions
Module	6	Range Variables
Module	7	Controlling Calculations
Module	8	Vectors and Matrices
Module	9	Units
Module	10	Chart Components
Module	11	2-D Plotting
Module	12	Project – Day 1

Day 2

Module	13	3-D Plotting
Module	14	Boolean Conditions
Module	15	Symbolics
Module	16	Solving
Module	17	Optimization
Module	18	Differential Equations
Module	19	Programming
Module	20	Data Exchange
Module	21	Data Analysis
Module	22	Project – Day 2

Course Content

Module 1. Getting Started

- i. Opening Mathcad
- ii. The Mathcad Workspace
- iii. Mathcad Worksheets
- iv. Saving Mathcad Files

Knowledge Check Questions

Module 2. Documenting and Formatting

- i. Text Regions
- ii. Embedding Math in a Text Region
- iii. Options for Formatting Worksheets
- iv. Understanding Mathcad Templates

Knowledge Check Questions

Module 3. Entering and Editing Math

- i. Using Operators
- ii. Entering and Evaluating a Mathematical Expression
- iii. Formatting Math Regions
- iv. Formatting Mathematical Results
- v. Implied Multiplication

Knowledge Check Questions

Module 4. Variables

- i. Defining a Variable
- ii. Numerically Evaluating a Variable
- iii. Defining a Global Variable
- iv. Assigning an Expression Retroactively
- v. Using Literal Subscripts

Knowledge Check Questions

Module 5. Functions

- i. Defining a User-Defined Function
- ii. Inserting a Built-In Function
- iii. Design of Experiments Functions
- iv. Using Deprecated Functions

Knowledge Check Questions

Module 6. Range Variables

- i. Defining a Range Variable
- ii. Using a Range Variable

Knowledge Check Questions

Module 7. Controlling Calculations

- i. Controlling Calculations
- ii. Using Calculation Options
- iii. Using Areas

Knowledge Check Questions

Module 8. Vectors and Matrices

- i. Vectors and Matrices
- ii. Defining Vectors and Matrices
- iii. Extracting Elements from an Array
- iv. Nested Arrays
- v. Using Array Operators and Functions

Knowledge Check Questions

Module 9. Units

- i. Selecting a Unit System
- ii. Using Units
- iii. Adding Units to Arrays and Range Variables
- iv. Using Angular Units
- v. Using Temperature Units

Knowledge Check Questions

Module 10. Chart Components

- i. Using a Chart Component
- ii. Plotting Traces in a Chart Component
- iii. Formatting Traces Using the Chart Window
- iv. Using Units in the Chart Component

Knowledge Check Questions

Module 11. 2-D Plotting

- i. Plotting Data in 2-D
- ii. Plotting Functions in 2-D
- iii. 2-D Plot Formatting
- iv. 2-D Trace Formatting
- v. 2-D Axes Formatting
- vi. Using Units with 2-D Plots

Knowledge Check Questions

Module 12. Project – Day 1

- i. Structural Engineering Project – Day 1
- ii. Mechanical Engineering Project – Day 1

Module 13. 3-D Plotting

- i. Plotting Functions in 3-D
 - ii. Formatting a 3-D Plot
-

- iii. Plotting Data in 3-D
- iv. Plotting Multiple Traces

Knowledge Check Questions

Module 14. Boolean Conditions

- i. Using Boolean Operators
- ii. Writing Equations Using Boolean Operators
- iii. Creating Conditional Statements
- iv. Using Piecewise Continuous Functions

Knowledge Check Questions

Module 15. Symbolics

- i. Symbolics
- ii. Symbolic Calculation
- iii. Symbolic Algebra

Knowledge Check Questions

Module 16. Solving

- i. Solving for Roots of Equations
- ii. Numerically Solving Systems of Linear Equations
- iii. Numerically Solving Systems of Nonlinear Equations
- iv. Symbolically Solving Systems of Equations
- v. Modifying the Convergence and Constraint Tolerance

Knowledge Check Questions

Module 17. Optimization

- i. Constrained Optimization
- ii. Unconstrained Optimization

Knowledge Check Questions

Module 18. Differential Equations

- i. Ordinary Differential Equations

Knowledge Check Questions

Module 19. Programming

- i. Creating a Program
- ii. Conditional Statements
- iii. Looping Constructs

Knowledge Check Questions

Module 20. Data Exchange

- i. Importing Data
- ii. Exporting Data
- iii. Using the Excel Component

Knowledge Check Questions

Module 21. Data Analysis

- i. Data Analysis
- ii. Smoothing Data
- iii. Interpolating Data
- iv. Regressing Data

Knowledge Check Questions

Module 22. Project – Day 2

- i. Structural Engineering Project – Day 2
- ii. Mechanical Engineering Project – Day 2
