

Introduction to PTC Pro/INTRALINK 11.0

Overview

Course Code	TRN-4757-T
Course Length	16 Hours

In this course, you will learn how to complete basic functions to navigate and view information within Pro/INTRALINK. You will discover how to access and navigate the Pro/INTRALINK environment, view product information, use Pro/INTRALINK's visualization tools, manage assigned tasks, and perform basic work management functions. Additionally, you will be taught the key capabilities and features of Pro/INTRALINK CAD Data Management and how to use Pro/INTRALINK to manage Creo design information. Specifically, you will focus on the day-to-day data management tasks required by the Creo user community. You will also learn how to use Pro/INTRALINK to perform basic PDM functions on Creo CAD Documents.

At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in PTC University Proficiency intended to evaluate your understanding of the course as a whole.

This course has been developed using Windchill 11.0 F000.

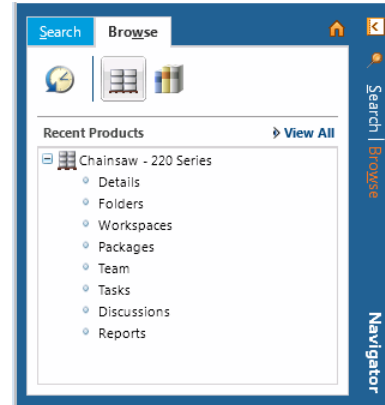

Since there is no specific course material for this, in this course, Pro/Creo profiled content is used to support training for PDME. It is decided to use single Virtual Machine environment to cover all of the Windchill training, therefore you might see WTParts in various products while performing the exercises.
