

## On Your Schedule!

Designed for the unemployed, these programs provide comprehensive training that is fast & flexible. You can choose electives from all of our other courses plus additional lab work and projects to build a portfolio for potential employers. If you get a job before your scheduled completion date, we will extend your program out to a full 12 months at no charge to you or your future employer. Who else will do this for you? Our Certificate programs give you the experience employers are looking for!

Train remote or in-center, when you want to, while maintaining on-demand access to Ve-I instructors. Training lessons also available 24/7 for self-study.

**In-Center Attendance:** Attend training in our physical training center. Our instructors are available on-demand when you need them. Ve-I provides the facility, workstation & software required to execute the coursework. You can attend based on your schedule, not ours.

**Remote Attendance:** Tap directly into our training center remotely and work with our on-staff instructors, on-demand, like you would in a physical training room. Instructors can talk to the students and view their workstation session to assist or share their own screen to lecture.

Ve-I is State of MA Section 30 & TAA Approved  
Program is WIOA/Section 30/Trade Act Eligible  
Ve-I is a Licensed Post-Secondary Education Institution

*We are a Veteran Friendly Institution*

"GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by the VA is available at the official U.S. government website at <http://www.benefits.va.gov/gibill.>"

*Classes can be taken individually*

Pricing is subject to revision at any time. Ve-I reserves the right to change fees, courses, topics, policies, programs, services and personnel as required. "Unlimited" refers to instructor and facility access during our normal business hours, which are Monday – Friday from 8:00AM to 5:00PM except Federal Holidays and shutdowns. Most course material can be accessed 24/7 for afterhours study. Instructor support is limited to purchased training materials and labs. Remote students must have access to legal CAD Licenses and required modules for the training. A Student Edition may be supplied for an additional fee. Remote setup assistance is included.

# Mechanical Design Applications Specialist Certificate Programs

These programs prepare students to be proficient 3D Parametric Solid Modelers & Detailers using industry standard 3D Mechanical Computer Aided Design (MCAD) tools. Students will learn to create 3D models and produce technically accurate drawings of mechanical parts, mechanisms and assemblies while learning industry standard drafting & modeling practices. Electrical wiring & schematics, piping & HVAC is also taught where applicable. Students will utilize their choice of SolidWorks, Creo (Formerly Pro/Engineer) or Inventor.

On Your Schedule

Detailed Brochures Available

All of our Mechanical Design Applications Specialists Programs include a minimum of 12 weeks of hands on instruction and experience with the chosen CAD tool. CAD drills and comprehensive projects are included and used to build a portfolio to show prospective employers that you're not just taught... you're experienced!

Find a job before program completion and we will extend it out to a full 12 months at no charge to you or your new employer! What a great benefit when interviewing!

## **Creo** (formally Pro/ENGINEER)

You will become proficient with the PTC Creo (Formerly Pro/Engineer) family of products widely used in the Aerospace, Defense, Product Development, Medical Device and other high-end industries demanding best in class.

## **SolidWorks**

You will become proficient with the SolidWorks family of products to conceptualize, create, validate, communicate, manage, and transform your innovative ideas into great product designs. Widely used in all Product Development industries.

## **Inventor**

You will become proficient with the Autodesk Inventor 3D family of products including AutoCAD Electrical & 2D, widely used in the Architectural, Civil, Electrical & Product Development industries.
