

We train on *your* schedule.

Visible Edge Institute has been providing classroom training for over 30 years and remote training for over a decade. Our flexible, comprehensive training programs are designed to accommodate individuals of ***all*** skill levels.

As a Licensed Post-Secondary Educational Institution, our training provides students with hands-on experience, in-depth skills in leading applications, and industry-recognized certifications. You'll get the opportunity to earn industry-recognized certifications in all of our programs.

Train remotely or in-center, while maintaining on-demand access to our live instructors. Students can also access training lessons 24/7 for self-study.

Remote Attendance: Remotely tap into our training center to work directly with live instructors on-demand via phone, video call, screen sharing, email, chat or text.

In-Center Attendance: Choose to attend training in our physical training center on your schedule, not ours. Our renovated in-center learning environment utilizes state of the art equipment and modern learning techniques including one-on-one live instructor interactions, digital materials, labs, and project work.

You may qualify to have your entire program paid for, 100%, with no out-of-pocket costs to you. All programs are federally approved by WIOA, Section 30, Trade Adjustment Act, Vocational Rehab, and more.

We are a Veteran Friendly Institution.

Ve-I reserves the right to change fees, courses, topics, policies, programs, services and personnel as required. "On-Demand" refers to instructor and facility access during our normal business hours, which are Monday - Friday from 8:00AM to 5:00PM except Federal Holidays and shutdowns. Instructor support is limited to purchased training materials and labs. Remote setup assistance is included.

EXPLORATORY PROGRAMS

VISIBLE EDGE INSTITUTE

CERTIFICATE PROGRAMS

Open Career Studies

Designed for individuals who have existing job experience in a particular field - but are looking to gain additional targeted skills, broaden their marketability, or qualify for a specific job position.

Our Open Career Studies program allows you to create a customized training plan that targets key skills gaps in order to meet your job qualification goals. This program is especially useful for students who already possess significant knowledge or experience in a field, but need to fill gaps or update their skills.

Your personalized program grants you the ability to explore all different industries - from Cybersecurity to Project Management, Office Administration, Information Technology (IT), Web Design, Web Development, Digital Marketing, Social Media, Data Analytics, Data Science, Business Intelligence (BI), Manufacturing, Engineering, CAD, Architectural Design, Civil Design, Robotics, the Internet of Things (IoT), and more.

Choose what you want to learn more about as you go along. Discover a new topic you're interested in half way through your program? No problem. We can redirect the rest of your learning path to meet your interests, needs, and goals.

Whether you're looking for a new position, hoping to advance in your current position, or simply want to expand your skill set - this program proves your dedication, knowledge, and expertise.

To learn more about this program, please visit:

<https://www.visible-edge.com/open-career-studies/>

Science & Technology Exploration (STEP)

Designed for the recent graduate or displaced worker - our exploratory program gives students exposure to top science and technology career paths.

Explore the immersive worlds of science and technology. The program provides exposure to countless career paths while simultaneously allowing you to earn industry-recognized certifications and credentials.

Your personalized program explores expanding and desirable science and technology career options. Our counselors work with you to narrow down options from a list of over 2,000 courses in order to create a customized training program that takes into consideration your interests and passions - while also guiding you into "in-demand" and "bright outlook" careers.

All assigned courses are your choice, with no pre-determined core courses. This means that you will have the opportunity to select from a long list of career paths that highlight and teach emerging industry-standard skills and tools used by top companies around the world.

Choose from various topics such as Computer Aided Design (CAD) technologies, Manufacturing, Cybersecurity, Animation, Engineering, Mathematics, Probability, Statistics, Aerospace, Data Science, Data Analytics, Internet of Things (IoT), Programming, Robotics, Architectural Design, Civil Design, and more.

This program guides students into a long-term career path while simultaneously helping learn marketable skills, enter emerging careers, explore interests, and have some fun.
